

## collection management

All objects need effective and appropriate care in order to ensure their survival. Good care will also optimise the benefits accrued from keeping them.

Cultural Connotations can provide advice on appropriate

- storage
- handling
- conservation
- access, and
- display practices for your collection objects. Our team can also develop comprehensive collection management policies which detail the mission and scope, and provide strategies for acquisitions, documentation, loans, collection care, access, insurance and deaccessions.

We also have extensive experience in preparing collection significance assessments.

Our strong project management experience will ensure this is done efficiently and effectively.
